GLOSSARY

| Abbreviation | Description |
|-------------------------|--|
| BEIS | Department for Business, Energy and Industrial Strategy. |
| CCGT | Combined Cycle Gas Turbine. |
| DCO | Development Consent Order: provides a consent for building and operating an NSIP. |
| EfW | Energy from Waste: the combustion of waste material to provide electricity and/ or heat. |
| EIA | Environmental Impact Assessment. |
| EPUKI | EP UK Investments Ltd. |
| ES | Environmental Statement. |
| ExA | Examining Authority: An inspector or panel of inspectors appointed to examine the application. |
| MW | Megawatt: the measure of power produced. |
| NELC | North East Lincolnshire Council. |
| NPS | National Policy Statement. |
| NSIP | Nationally Significant Infrastructure Project: for which a DCO is required. |
| PA 2008 | Planning Act 2008. |
| PEIR | Preliminary Environmental Information Report – summarising the likely environmental impacts of the Proposed Development. |
| PINS | Planning Inspectorate. |
| Q2 | Quarter 2 |
| SHBEC | South Humber Bank Energy Centre. |
| SHBPS | South Humber Bank Power Station. |
| SoCC | Statement of Community Consultation: sets out how a developer will consult the local community about a proposed NSIP. |
| EP Waste Management Ltd | The Applicant. |
| SoS | Secretary of State. |

1.0 INTRODUCTION

1.1 Overview

- 1.1.1 This 'Application Guide' document (Document Ref. 1.2) has been prepared on behalf of EP Waste Management Limited ('EPWM' or the 'Applicant'). It forms part of the application (the 'Application') for a Development Consent Order (a 'DCO'), that has been submitted to the Secretary of State (the 'SoS') for Business, Energy and Industrial Strategy, under section 37 of 'The Planning Act 2008' (the 'PA 2008').
- 1.1.2 EPWM is seeking development consent for the construction, operation and maintenance of an energy from waste ('EfW') power station with a gross electrical output of up to 95 megawatts (MW) including an electrical connection, a new site access, and other associated development (together 'the Proposed Development') on land at South Humber Bank Power Station ('SHBPS'), South Marsh Road, near Stallingborough in North East Lincolnshire ('the Site').
- 1.1.3 A DCO is required for the Proposed Development as it falls within the definition and thresholds for a 'Nationally Significant Infrastructure Project' (a 'NSIP') under sections 14 and 15(2) of the PA 2008.
- 1.1.4 The DCO, if made by the SoS, would be known as the 'South Humber Bank Energy Centre Order' ('the Order').
- 1.1.5 Full planning permission ('the Planning Permission') was granted by North East Lincolnshire Council ('NELC') for an EfW power station with a gross electrical output of up to 49.9 MW and associated development ('the Consented Development') on land at SHBPS ('the Consented Development Site') under the Town and Country Planning Act 1990 on 12 April 2019. Since the Planning Permission was granted, the Applicant has assessed potential opportunities to improve the efficiency of the EfW power station, notably in relation to its electrical output. As a consequence, the Proposed Development would have a higher electrical output (up to 95 MW) than the Consented Development, although it would have the same maximum building dimensions and fuel throughput (up to 753,500 tonnes per annum (tpa)).

1.2 The Applicant

- 1.2.1 The Applicant is a subsidiary of EP UK Investments Limited ('EPUKI'). EPUKI owns and operates a number of other power stations in the UK. These include SHBPS and Langage (Devon) Combined Cycle Gas Turbine ('CCGT') power stations, Lynemouth (Northumberland) biomass-fired power station, and power generation assets in Northern Ireland. EPUKI also owns sites with consent for new power stations in Norfolk (King's Lynn 'B' CCGT) and North Yorkshire (Eggborough CCGT).
- 1.2.2 EPUKI is a subsidiary of Energetický A Průmyslový Holding ('EPH'). EPH owns and operates energy generation assets in the Czech Republic, Slovak Republic, Germany, Italy, Hungary, Poland, Ireland, and the United Kingdom.

1.3 The Proposed Development Site

- 1.3.1 The Proposed Development Site (the 'Site' or the 'Order limits') is located within the boundary of the SHBPS site, east of the existing SHBPS, along with part of the carriageway within South Marsh Road. The principal access to the site is off South Marsh Road.
- 1.3.2 The Site is located on the South Humber Bank between the towns of Immingham and Grimsby; both over 3 km from the Site. The surrounding area is characterised by industrial uses dispersed between areas of agricultural land with the nearest main settlements being the villages of Stallingborough, Healing and Great Coates. The Site lies within the parish of Stallingborough although Stallingborough village lies over 2 km away.
- 1.3.3 The Site lies within the administrative area of NELC, a unitary authority. The Site is owned by EP SHB Limited, a subsidiary of EPUKI, and is therefore under the control of the Applicant, with the exception of the highway land on South Marsh Road required for the new Site access.
- 1.3.4 The existing SHBPS was constructed in two phases between 1997 and 1999 and consists of two CCGT units fired by natural gas, with a combined gross electrical capacity of approximately 1,400 MW. It is operated by EP SHB Limited.
- 1.3.5 The Site is around 23 hectares ('ha') in area and is generally flat, and typically stands at around 2.0 m Above Ordnance Datum (mAOD).
- 1.3.6 The land surrounding the Site immediately to the south, west and north-west is in agricultural use with a large polymer manufacturing site, Synthomer, and a waste management facility, NEWLINCS, both located to the north of the Site and also accessed from South Marsh Road. The estuary of the River Humber lies around 175 m to the east of the Site.
- 1.3.7 Access to the South Humber Bank is via the A180 trunk road and the A1173. The Barton railway line runs north-west to south-east between Barton-on-Humber and Cleethorpes circa 2.5 km to the south-west of the Site and a freight railway line runs north-west to south-east circa 300 m (at the closest point) to the Site.
- 1.3.8 A more detailed description of the Site is provided at Chapter 3: Description of the Proposed Development Site in the Environmental Statement ('ES') Volume I (Document Ref. 6.2).

1.4 The Proposed Development

- 1.4.1 The main components of the Proposed Development are summarised below:
- Work No. 1— an electricity generating station located on land at SHBPS, fuelled by refuse derived fuel ('RDF') with a gross electrical output of up to 95 MW at ISO conditions;
 - Work No. 1A— two emissions stacks and associated emissions monitoring systems;
 - Work No. 1B— administration block, including control room, workshops, stores and welfare facilities;

- Work No. 2— comprising electrical, gas, water, telecommunication, steam and other utility connections for the generating station (Work No. 1);
- Work No. 3— landscaping and biodiversity works;
- Work No. 4— a new site access on to South Marsh Road and works to an existing access on to South Marsh Road; and
- Work No. 5— temporary construction and laydown areas.

1.4.2 Various types of ancillary development further required in connection with and subsidiary to the above works are detailed in Schedule 1 of the DCO. A more detailed description of the Proposed Development is provided at Schedule 1 'Authorised Development' of the Draft DCO and Chapter 4: The Proposed Development in the ES Volume I (Document Ref. 6.2) and the areas within which each of the main components of the Proposed Development are to be built is shown by the coloured and hatched areas on the Works Plans (Document Ref. 4.3).

1.5 Relationship with the Consented Development

1.5.1 The Proposed Development comprises the works contained in the Consented Development, along with additional works not forming part of the Consented Development ('the Additional Works'). The Additional Works are set out below along with an explanation of their purpose.

- a larger air-cooled condenser (ACC), with an additional row of fans and heat exchangers – this will allow a higher mass flow of steam to be sent to the steam turbine whilst maintaining the exhaust pressure and thereby increasing the amount of power generated;
- a greater installed cooling capacity for the generator – additional heat exchangers will be installed to the closed-circuit cooling water system to allow the generator to operate at an increased load and generate more power;
- an increased transformer capacity – depending on the adopted grid connection arrangement the capacity will be increased through an additional generator transformer operating in parallel with the Consented Development's proposed generator transformer or a single larger generator transformer. Both arrangements would allow generation up to 95 MW; and
- ancillary works – the above works will require additional ancillary works and operations, such as new cabling or pipes, and commissioning to ensure that the apparatus has been correctly installed and will operate safely and as intended.

1.5.2 The likely construction scenario is for work on the Consented Development (pursuant to the Planning Permission) to commence in Quarter 2 ('Q2') of 2020 and to continue for around three years. Following grant of a DCO for the Proposed Development (approximately halfway through the three-year construction programme), the Applicant would initiate powers to continue development under the Order instead of the Planning Permission. The Order includes appropriate powers and notification requirements for the 'switchover' between consents, to provide clarity for the relevant planning authority

regarding the development authorised and the applicable conditions, requirements, and other obligations. Once the Order has been implemented the additional works would be constructed and the Proposed Development would be built out in full. The Proposed Development would commence operation in 2023.

- 1.5.3 Alternative construction scenarios, involving construction entirely pursuant to the Order, are also possible. Accordingly, three representative scenarios are described within Chapter 5: Construction Programme and Management in the ES Volume I (Document Ref. 6.2) and assessed in the Environmental Impact Assessment ('EIA').

1.6 The Purpose and Structure of this Document

- 1.6.1 The purpose of this Application Guide is to list the documents (the 'Application Documents') that make up the Application submitted to the SoS. In addition, it sets out how the Application Documents submitted comply with relevant legislative and policy requirements and guidance.
- 1.6.2 The Application Guide will be updated by EPWM, as required, during the examination of the Application by the SoS and documents that have been superseded will be clearly identified as such.
- 1.6.3 The Application Documents are listed in Section 2 (Table 2.1) of this document.

2.0 APPLICATION DOCUMENTS

- 2.1.1 The Application Documents have been grouped into appropriate categories and each has been given its own document reference in Table 2.1 on the following pages.
- 2.1.2 In addition to listing the Application Documents submitted, Table 2.1 also identifies where these have been provided to comply with relevant legislative requirements, or specific policy and relevant guidance. The legislative requirements for DCO applications are principally contained in the PA 2008, the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 (the 'APFP Regulations') and the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (the '2017 EIA Regulations'). Specific policies are set out in relevant energy National Policy Statements ('NPSs') including the Overarching Policy Statement for Energy (EN-1) ('EN-1') and the National Policy Statement for Renewable Energy Infrastructure (EN-3) ('EN-3').
- 2.1.3 Regulation 5 in the APFP Regulations lists the documents that all DCO applications must include. Regulation 5 includes a category (Reg. 5(2)(q)) described as "*any other documents considered necessary to support the application*". Similarly, Regulation 5 (Reg. 5(2)(o)) also allows applicants to submit other plans, drawings and sections which are considered necessary to describe the project. The documents and plans and drawings that have been provided by EPWM under these categories of Regulation 5 are therefore not statutorily required but are those which it considers are necessary to explain and support the Application.
- 2.1.4 Regulation 6 in the APFP Regulations sets out a number of documents that particular types of DCO application must include. Those relating to generating stations and pipelines are relevant to the Proposed Development and include a Grid Connection Statement, and Gas Connection and Pipeline Statement.
- 2.1.5 The Application submitted for the Proposed Development is considered to comply with the statutory requirements of the PA 2008, the APFP Regulations and the 2017 EIA Regulations, and also with the applicable SoS and PINS guidance, including PINS Advice Note 6 'Preparation and submission of application documents' (November 2019, version 8).

Table 2.1: Application Documents

| Application Document Reference | Application document name | Statutory/other requirement/comment | Current revision number |
|---------------------------------------|---|---|--------------------------------|
| Category 1.0 | Application Form and related documents | | |
| 1.1 | Application Cover Letter | APFP Reg. 5(2)(q) | 1.0 |
| 1.2 | Application Guide (this document) | APFP Reg. 5(2)(q) | 1.0 |
| 1.3 | Application Form | Section 37(3)(b) and APFP Reg. 5(1) | 1.0 |
| 1.4 | Notices for Statutory Publicity | APFP Reg. 5(2)(q), PINS Advice Note 6 and Application Form (Boxes 8(b) and 14(c)) | 1.0 |
| Category 2.0 | Draft Development Consent Order | | |
| 2.1 | Draft Development Consent Order | APFP Reg. 5(2)(b) (the draft proposed order) | 1.0 |
| 2.2 | Explanatory Memorandum | APFP Reg. 5(2)(c) (an explanatory memorandum explaining the purpose and effect of provision in the draft order) | 1.0 |
| Category 3.0 | Land Information / Compulsory Acquisition Information | | |
| 3.1 | Book of Reference | APFP Reg. 5(2)(d) and Reg. 7 | 1.0 |
| Category 4.0 | Plans | | |
| 4.1 | Site Location Plan | APFP Reg.5(2)(o) | 1.0 |
| 4.2 | Land Plan | APFP Reg.5(2)(i) | 1.0 |
| 4.3 | Works Plans | APFP Reg. 5(2)(j) | 1.0 |
| 4.4 | Access and Rights of Way Plan | APFP Reg. 5(2)(k) | 1.0 |
| 4.5 | Indicative Generating Station Plan, Floor Plans, Section and Elevations | APFP Reg. 5(2)(o) | 1.0 |

| Application Document Reference | Application document name | Statutory/other requirement/comment | Current revision number |
|---------------------------------------|---|---|--------------------------------|
| 4.6 | Indicative Gas Connection Plan | APFP Reg. 5(2)(o) | 1.0 |
| 4.7 | Indicative Electrical Connection Plan | APFP Reg. 5(2)(o) | 1.0 |
| 4.8 | Indicative Towns Water Connection Plan | APFP Reg. 5(2)(o) | 1.0 |
| 4.9 | Indicative Surface Water Drainage Plan | APFP Reg. 5(2)(o) | 1.0 |
| 4.10 | Indicative Landscape Plan | APFP Reg. 5(2)(o) | 1.0 |
| 4.11 | Biodiversity Plan | APFP Reg. 5(2)(o) | 1.0 |
| 4.12 | Proposed Development and Consented Development Boundary Comparison Plan | APFP Reg. 5(2)(o) | 1.0 |
| Category 5.0 | Reports and Statements | | |
| 5.1 | Consultation Report | Section 37(3)(c) (application to be accompanied by the consultation report) | 1.0 |
| 5.2 | Grid Connection Statement | APFP Reg. 5(2)(p) (any documents prescribed by Reg. 6) and Reg. 6(1)(a)(i) (a statement of who will be responsible for designing and building the connection to the electricity grid) | 1.0 |
| 5.3 | Gas Connection and Pipeline Statement | APFP Regs. 5(2)(p) (any documents prescribed by Reg. 6), Reg. 6(1)(a)(ii) and 6(4). | 1.0 |
| 5.4 | Other Consents and Licences | APFP Reg. 5(2)(q) and PINS Advice Note 6 | 1.0 |

| Application Document Reference | Application document name | Statutory/other requirement/comment | Current revision number |
|---------------------------------------|--|--|--------------------------------|
| 5.5 | Planning, Design and Access Statement | APFP Reg. 5(2)(q) | 1.0 |
| 5.6 | Combined Heat and Power Assessment | APFP Reg. 5(2)(q), EN-1 - 4.6 and EN-3 - 2.5.26-2.5.27 | 1.0 |
| 5.7 | Fuel Availability and Waste Hierarchy Assessment | APFP Reg. 5(2)(q) and NPS EN-3 – paras.2.5.66-2.5.69 | 1.0 |
| 5.8 | Habitats Regulations Assessment Signposting Report | APFP Reg. 5(2)(g) (any report identifying any European site to which regulation 48 of the Conservation (Natural Habitats, &c.) Regulations 1994 applies, or any Ramsar site, which may be affected by the proposed development, together with sufficient information that will enable the Commission to make an appropriate assessment of the implications for the site if required by regulation 48(1)) | 1.0 |
| 5.9 | Statutory Nuisance Statement | APFP Reg. 5(2)(f) (a statement whether the proposal engages one or more of the matters set out in section 79(1) (statutory nuisances and inspections thereafter) of the Environmental Protection Act 1990 (as amended) and if so, how the applicant proposes to mitigate or limit them) | |

| Application Document Reference | Application document name | Statutory/other requirement/comment | Current revision number |
